OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Lone Star Army Ammunitions Plant (LSAAP) in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for LSAAP began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Texas Archaeological Research Laboratory (TARL) at the University of Texas and the Texas Historical Commission, both located in Austin. The records search was performed in March 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT LONE STAR AAP

Archaeological work on LSAAP has been conducted by three institutions since 1980. It should be noted that LSAAP shares grounds and buildings with Red River Army Depot (RRAD), and although they are administratively separate installations, boundaries are contiguous and not clearly defined on the U.S.G.S. quadrangle map. A roughly arbitrary boundary of Caney Creek has been cited by personnel from both installations and ownership of site locations has therefore been assigned according to this geological feature (telephone conversations: Roxanne Almodovar, 30 January 1995; Mark Reese, 19 January 1995). However, because this boundary is arbitrary, and because most of the known archaeological investigations at these two installations were conducted concurrently, in some instances the site location ownership has been assigned by the site recorder only as "U.S. Army." Therefore, it may not be possible in all cases to accurately determine which sites fall within each installation.

Three contractors have conducted the archaeological investigations at LSAAP:

Espey Huston and Associates, Inc., Austin, Texas,
Geo-Marine, Inc., Plano, Texas.
Institute of Applied Science (IAS) University of North Texas, Denton, and

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission. Of these three, only Espey Huston and Associates did not collect artifacts.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 4.5 ft³ of boxed archaeological materials and associated documentation have been identified for LSAAP. Artifacts recovered were predominately historic objects of glass, metal, ceramic, animal bone, and brick. The remaining portion of the collections consisted of non-diagnostic prehistoric lithic materials such as biface fragments, flakes, and fire-cracked rock. One site contained a few temporally and functionally non-diagnostic prehistoric ceramic fragments. As of the date of this report, these artifacts are reportedly located at the following two repositories:

Espey Huston and Associates, Inc, Austin, Texas	< 1 linear foot of documentation
IAS, University of North Texas, Denton, Texas	3.5 ft ³ of objects and documentation

The attached *Summary of Current Locations of Archaeological Collections from LSAAP* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA Related Materials

MCX research identified no human remains, funerary objects, or sacred objects during its review of archaeological records, associated literature, and telephone interviews for Lone Star Army Ammunition Plant. The final determination of sacred objects or objects of cultural patrimony may be established through consultation with Native American tribes that have met the definition of culturally affiliated tribes and/or lineal descendants and for the objects specified by law in NAGPRA.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Two sets of references regarding archaeological work conducted on LSAAP are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH LONE STAR AAP

According to Waldman (1988:33-34) the Caddo exclusively inhabited the area presently occupied by LSAAP. Waldman defines the Caddo territory as stretching from the Red River Valley in Louisiana to the Brazos River in Texas and Arkansas. This information is further verified by Hudson (1976:5-6, Map 1), and the map of Indian Land Areas Judicially Established 1978 (U.S.G.S. n.d.). Additionally, some of the ceramics identified in the site forms for RRAD (which shares boundaries with LSAAP) are Caddoan in type. These Caddoan ceramics are a distinct vessel form with engraved decoration that have been dated circa A.D. 700 and are among the earliest pottery found in east-central Texas (Story 1990:247). The Caddo Indian Tribe of Oklahoma is a federally recognized tribe.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix I).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR LONE STAR ARMY AMMUNITIONS PLANT, TEXAS

[Installation Header]

Mr. Noah Frank, Chairperson
Caddo Tribal Council
P.O. Box 487
Binger, OK 73009

Dear Mr. Frank:

I am writing to inform you of collections held by the Lone Star Army Ammunitions Plant (LSAAP) that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Caddo. The LSAAP has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

The LSAAP is responsible for archaeological collections and associated documentation generated from surveys and/or excavations conducted from 1980 to the present. Based on information obtained during records searches, these collections consist of predominately historic materials such as brick, ceramics, glass, animal bone, and metal fragments. Some prehistoric stone tools, stone waste flakes, and ceramic fragments were also identified. No human skeletal remains or associated funerary objects have been identified in the records for these collections.

We are notifying the Caddo because some of the investigations were conducted in, or around, the area thought to be part of the territory occupied or used aboriginally by the Caddo. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between LSAAP and the Caddo on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM LONE STAR ARMY AMMUNITIONS PLANT, TEXAS

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here.
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
